Subject: Application for Static Equipment Mechanical Engineer – SME | Yanbu, Saudi Arabia

Dear Hiring Team,

I am writing to express my strong interest in the Static Equipment Mechanical Engineer (SME) position based in Yanbu, Saudi Arabia. With a Bachelor's Degree in Mechanical Engineering, over 8 years of progressive experience in industrial maintenance, heavy equipment operations, and asset management, and professional certifications including **CMRP (Certified Maintenance & Reliability Professional)** and **PMP**, I am well-equipped to contribute to your reliability and static equipment integrity programs.

Throughout my career—currently supervising mechanical maintenance at SAPTCO and previously managing heavy plant machinery and hydraulic systems at PETRA Ready Mixed Concrete—I have focused on driving asset availability, optimizing maintenance strategies, and implementing rigorous reliability practices.

My background aligns with the core focus areas of this role in the following ways:

- **Reliability & Maintenance Strategies:** I hold the **CMRP** certification and have extensive practical experience in developing and implementing preventive and corrective maintenance plans, reducing unplanned downtime, and monitoring equipment performance.
- **Asset Integrity & Mechanical Systems:** My engineering foundation covers comprehensive mechanical systems, hydraulic assemblies, troubleshooting, and strict adherence to safety and quality standards (backed by NEBOSH and OSHA training).
- **Root Cause Analysis & Problem Solving:** I routinely lead technical teams through complex root cause analysis (RCA), failure investigations, and continuous process improvements to ensure operational reliability.
- **Technical Leadership & Documentation:** I have successfully trained and mentored over 200+ engineers and technicians, fostering a culture of precise technical documentation, safety compliance, and operational excellence.

While my primary background has been centered on heavy fleet, hydraulic machinery, and industrial plant operations rather than static oil & gas equipment (such as pressure vessels or formal API/RCM workshops), I am a fast learner with a solid mechanical and reliability foundation. I am fully prepared to apply my maintenance discipline, analytical skills, and CMRP principles to master static equipment integrity standards under your guidance.

I am based in Saudi Arabia and ready for immediate contribution. Please find attached my complete documentation file containing my updated CV, educational certificates, experience credentials, and passport copy as requested.

Thank you for your time and consideration. I look forward to discussing how my maintenance and reliability background can support your operations in Yanbu.

Sincerely,

Ahmed Aboud Ahmed Mohammedalhassan
